New Swedish furniture brand HAYMOZ launches the H01 COFFEE TABLE. A sculptural piece in limestone and oak.

Made of sheer limestone resting on an oak stand. The H01 coffee table is stable and solid, with sharp edges but yet with a lightness and an ease to it. It's the perfect place to put your coffee cup, your feet up and arrange your favorite books and reads. The coffee table is designed and produced in Sweden with a focus on craftsmanship and sustainability - made to last for a lifetime or longer. Available for online order from October 9th 2020.

What started as a personal reflection about mindful living and an interest in furnitures that could out stand trends and be durable enough both in its esthetics and composition, lead to a full scale production. The new Swedish furniture brand HAYMOZ, design objects made to last for a lifetime, in quality and sense of style.

The H01 coffee table is designed by Rebecka Haymoz to complement the living room and enhance the feeling of raw nature at home, but at the same time the piece is exuding enough to truly stand on its own, like a sculpture, in its own right.

"Stripped down to the bare essentials and cut to the core, leaving these two materials playing the lead role without the distraction of hardware or other fittings. No tools, no screws, no visual noise. There's nothing hidden, only the true essence of two materials merged into unity. The solid base counterbalance the heavy chunk of limestone, that despite its weight appears to be resting almost effortlessly." says Rebecka Haymoz, designer and founder at HAYMOZ.

HAYMOZ is a furniture brand founded by Swedish interior architect Rebecka Haymoz. Rebecka combines furniture design with interior work for public spaces and private homes. HAYMOZ is all about timeless design, everyday life and finding the perfect combinations in materials, proportions and shape, with nature in mind. First products are launching in the fall of 2020.
