The Swedish furniture brand HAYMOZ launches their second product, the H02 SIDE TABLE. - A little nugget of greatness in limestone and wood.

H02 side table is a great table in a small format, designed by Rebecka Haymoz and crafted in Sweden. This functional table is elegant on its own but is advantageously placed together with its larger companion, the H01 coffee table, next to the favorite armchair or possibly as a nightstand. Made to last a lifetime or longer. Available for online order from December 21st 2020.

What started as a personal reflection about mindful living and an interest in furnitures that could out stand trends and be durable enough both in its esthetics and composition, lead to a full scale production. The new Swedish furniture brand HAYMOZ, design objects made to last for a lifetime in quality and sense of style.

“The H02 Side Table is crafted with the idea to leave no visual noise. There are no hardware or other, neither visible nor hidden components. It is modern, sleek and clever in itself with focus on true craftsmanship. The vivid limestone top speaks of stories from the past which makes this small, yet very versatile table a classical piece with a contemporary approach. The whole design rests on the counter balance between the masculine shape of the wood and the feminine touch of the round limestone top.” says Rebecka Haymoz, designer and founder at HAYMOZ.

HAYMOZ is a furniture brand founded by Swedish interior architect Rebecka Haymoz. Rebecka combines furniture design with interior work for public spaces and private homes. HAYMOZ is all about timeless design, everyday life and finding the perfect combinations in materials, proportions and shape, with nature in mind. Second product launches before Christmas 2020.
